Quiz

1

Have a look at the codes below. Which code shows the new syntax for writing `if` statements in C++17?

2

constexpr Lambda functions are constant expressions themselves, but they can invoke methods which are not constexpr.

3

C++17 introduces a new way of writing nested namespaces. Here we use

C++17 introduces a new way of writing nested namespaces. How can we rewrite the code below to fit C++17 standards?

```
namespace Building {
  namespace Floor {
    namespace Room {
      ...
    }
  }
}
```
