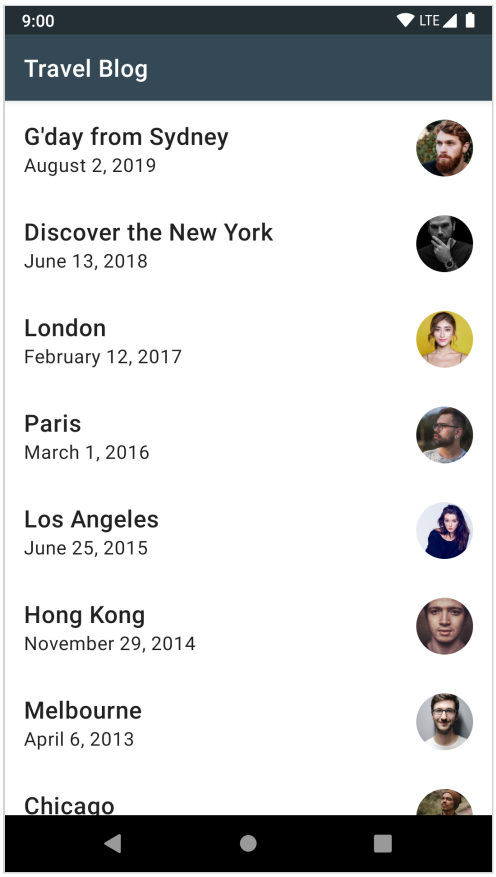
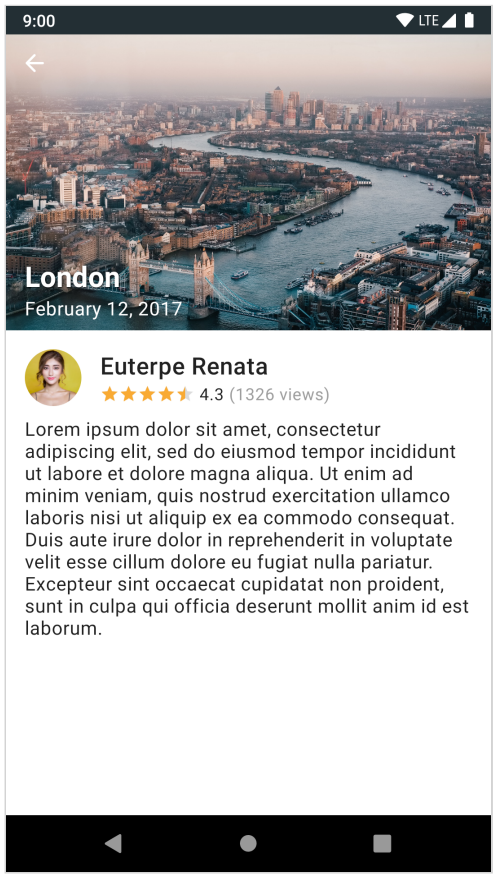
Overview

In this lesson, we will discuss what our blog detail activity is going to look like and what it will be able to do.

This chapter will cover how to create a blog list screen for Travel Blog Application and learn how to:

- display a list of data
- use pull-to-refresh to reload data
- handle list item click
- send data from one screen to another





In the next lesson, we will proceed with building the layout for our blog detail screen.
