

- Exercise

In this lesson, we'll solve an exercise.

WE'LL COVER THE FOLLOWING ^

- Problem statement

Problem statement

Analyzing email addresses.

- Create a text with an E-Mail address. Use a regular expression to extract the address from the text and analyze the match.

```
#include <iostream>

int main() {

    // Wirte your code here

}
```

The solution will be explained in the next lesson.
