

Quiz!

This quiz will test your knowledge of data models.

1

Which of the following is NOT a record-based logical data model?

COMPLETED 0%

1 of 7

We have reached the end of this chapter. Good Job! At this point, we should be familiar with the first step in database design: schemas. You also learned to classify databases by their different attributes.

In the next chapter, we will learn all there is to know about the entity-relationship data model.
