

Quiz

This lesson covers multiple choice questions related to sending data to web server.

1

Which object is used to send form data to the server?

2

Which function is used to fill the `FormData` object with values?

3

When the information expected by the server is more structured, which data format is more convenient to use?

4

The second parameter of the `fetch()` call sets the suitable HTTP method to send the response back to server. Is this statement True or False?

5

By default, the form submits the data asynchronously. Is this statement True or False?
