

# Quiz

It's quiz time! Answer the following questions to test your knowledge and understanding.

1

Select all the types of dead-letter queues that Lambda can use:

2

With synchronous calls, errors can be reported directly back to the caller, but the caller cannot decide whether it's worth retrying or not.

3

If there are no subscriptions to an event, what happens in the case of SNS

if there are no subscriptions to an event, what happens in the case of SNS if a message arrives?

4

Fill in the blanks:

In the `aws local generate-event` command, the first parameter after an `generate-event` is the \_\_\_\_\_. The second is the \_\_\_\_\_.

5

Fill in the blank:

CloudFormation can activate or deactivate resources based on certain

conditions, which we need to set up in a separate template section titled \_\_\_\_\_.
