

Challenge: Print Part of a String

This lesson presents a coding challenge based on string manipulation in D.

WE'LL COVER THE FOLLOWING ^

- Problem statement
- Input
- Output
- Challenge

Problem statement

In this problem, you are given a string and your task is to print the substring between the first and last occurrences of 'e'.

Input

```
this line has five words
```

Output

```
e has five
```

 Show Hint

Challenge

This problem is designed for you to practice, so try to solve it on your own first. If you get stuck, you can always refer to the explanation and solution provided in the next lesson. Good luck!

```
import std.stdio;
```

```
void PrintPart() {
```

```
    string line = "this line has five words";
```

```
    // Replace the below code line with your code
```

```
    write(" ");
```

```
}
```

Print part of a string

In the next lesson, you will find a solution to this challenge.
