

Quiz

In this lesson, we will solve a quiz to test the concepts that we have covered.

1

Why is Flask called a Microframework?

2

How do the Client and Server interact with each other over the Internet?

3

What is the functionality of a *View* in the **MVC** architecture?

4

What is the functionality of a *Model* in the **MTV** and **MVC** architectures?

5

What do we use **Jinja** for?

Check Answers

Well done! In the next chapter, we will finally begin creating a **Flask** application. Stay tuned!
