

Quick Quiz on Iteration & Loops

1

What is the output of the following code?

```
for a in "Python":  
    print (a)
```

2

What is the output of the following code?

```
Languages = ["Python", "Java", "R"]  
for x in Languages:  
    if x == "Java":  
        break  
    print(x)
```

3

What is the output of the following code?

```
i = 1
while i < 7:
    print(i)
    if (i == 3):
        break
    i += 1
```

4

What is the output of the following code?

```
i = 1
while i <= 7:
    i += 1
```

```
i += 1  
if (i == 3):  
  
    continue  
print(i)
```

Check Answers

Now that you have learned about iterations and loops, what if you want to store groups of objects? Let's learn about "Dictionaries" in the next chapter.
