

Quiz

In this lesson, we will solve a quiz related to the concepts covered in the previous lesson.

WE'LL COVER THE FOLLOWING ^

- Quiz
- Coding Challenge

Quiz

1

What is the correct output of the following code?

```
const me = Symbol("Alberto");  
console.log(me.description);
```

COMPLETED 0%

1 of 3

Coding Challenge

Transform the following multidimensional array into a single dimensional array in one line of code using the new Array method introduced in ES2019.

Educative does not support ES2019 yet, so try and run the test on your browser's Dev Tools. When the output matches the expected result, check the solution.

```
const letters = ['a', 'b', ['c', 'd', ['e', 'f']]];

function testResult(array){
  // transform the array here
  const newArray = [];
  return newArray;
}
// expected : ['a', 'b', 'c', 'd', 'e', 'f']
```

We'll look at the basics of **TypeScript** in the next lesson.
