

Demo

In this lesson, we see the running demo.

WE'LL COVER THE FOLLOWING ^

- Try the demo
- Next

Try the demo

We simply put together all the code from previous lessons. Run it, and see how it works.

```
import React from 'react';

import { Provider } from '../store';
import TodoList from './TodoList';

const App = () => (
  <Provider>
    <TodoList />
  </Provider>
);

export default App;
```

Next

All hands-on lessons are now finished. In the final chapter, we cover some further topics that are worth learning.
