

# Who is this course for?

Welcome to the course!

This course is for anyone who has a solid understanding of CSS and wants to take their coding to the next level. You don't need a formal degree or even any kind of background in technology to get started. All you need is the determination to learn!

By understanding CSS, I mean you should have experience using CSS to style HTML elements. Ideally, you'll have built a few web pages and be comfortable doing so. In saying that, it's not a strict prerequisite, but you'll find it much easier to get going with this knowledge.

So, if you're ready to learn all about SASS (short for Syntactically Awesome Stylesheets), you've come to the right place! We'll be going from beginner to advanced level. And by the end of the course, you'll be writing code that's faster, more efficient, and much easier to maintain.

So without further ado, let's get started!
