

Personal Notes

A short introduction about the mind behind this course.

WE'LL COVER THE FOLLOWING ^

- About Me

About Me

I have worked as a software architect, team lead, and instructor for about 20 years. In my spare time, I enjoy writing articles on topics such as C++, Python, and Haskell and also enjoy speaking at conferences. In 2016, I decided to work for myself. I organize and lead seminars about modern C++ and Python.
