

# Quiz

In this lesson, we will solve a quiz related to the concepts covered in the previous lesson.

## WE'LL COVER THE FOLLOWING ^

- Quiz
- Coding Challenge

## Quiz #

1

What is a **class**?

COMPLETED 0%

1 of 4

## Coding Challenge #

Given the following **class**, create a new one called **Adult** that extends the previous one and adds new property to it called **work**.

```
// our initial class
class Person {
  constructor(name,age){
```

```
    this.name = name;
    this.age = age;
  }

  greet(){
    console.log(`Hello, my name is ${this.name} and I am ${this.age} years old` );
  }
}

// create a new class that extends Person and adds new property to it
// class Adult ( ... continue from here )

function testResult(){
  const me = new Adult('Alberto',27,'software developer');
  return me.work;
  // software developer
}
```

We'll learn what is promise and how to use it.
