

- Exercise

Let's solve an exercise to check all the variations of the find function.

WE'LL COVER THE FOLLOWING ^

- Problem statement

Problem statement

The `find` variations of `std::string` have a special interface. Write a program that uses a few of these variations.

```
#include <iostream>

int main() {

    // Write your code here
}
```

In the next lesson, we'll look at the solution to the exercise.
