

- Exercise

In this lesson, we'll solve a problem regarding `std::array`.

WE'LL COVER THE FOLLOWING ^

- Problem statement

Problem statement

Try to access the index of the array that is greater than the size.

- Implement it with the index operator and the `at` function.

```
#include <iostream>

int main() {
    // Write your code here
    return 0;
}
```

In the next lesson, we'll discuss the solution of this exercise.
