

# Exercise: Triple Integral Over a Bounded Region

In this lesson, you will perform a triple integration over a bounded region.

## WE'LL COVER THE FOLLOWING ^

- Task
- Problem Statement

## Task #

In this exercise, we will solve an integral where the limits of integration will be functions of  $x$  and  $y$  instead of constants.

## Problem Statement #

Solve the following integral in Python and find the error in it:

$$\int_0^{1-x-y} \int_0^{1-x} \int_0^1 (5x - 3y) \, dx \, dy \, dz$$

 Show Numerical Answer

```
from scipy import *  
# write your code here
```

The solution to this exercise will be discussed in the next lesson.
