

Quiz: Deduce the Outputs

In this lesson your concepts will be evaluated through a quiz.

Choose one correct answer.

1

What is the output of the following code snippet?

```
capitals := map[string] string {"France":"Paris", "Italy":"Rome", "Japan":"Tokyo" }  
fmt.Println(capitals["Tokyo"])  
fmt.Println(capitals["Italy"])  
fmt.Println(capitals["Paris"])
```

We hope that you performed well in the quiz. That's about the maps. In the next chapter, we'll discuss packages in Go.
