

Quiz: Deduce the Outputs

In this lesson, your concepts will be evaluated through a quiz.

Choose one possible correct answer

1

Deduce the output of the following program:

```
package main
import "fmt"

type Any interface {}
type Anything struct {}

func main() {
    any := getAny()
    if any == nil {
        fmt.Println("any is nil")
    } else {
        fmt.Println("any is not nil")
    }
}

func getAny() Any {
    return getAnything()
}

func getAnything() *Anything {
    return nil
}
```

1 of 3

We hope that you performed well in the quiz. That's it about the interfaces. In the next chapter, we'll discuss reading and writing the information in detail.
