

Step 1: index.html

Create a folder for this experiment and place an `index.html` file in it with the following contents:

```
<!doctype html>
<html>
  <head>
    <title>Deposits and Withdrawals</title>
  </head>
  <body>
    <h1>Top 3 Transactions</h1>
    <ul class="js-top-transactions">
    </ul>
    <script src="myaccount.dist.js"></script>
  </body>
</html>
```

The file `myaccount.dist.js` does not exist yet. We will use [Webpack](#) to create it.
