## Problem Statement #

Implement the `Fibonacci` function that takes a number `n` and calculates the nth Fibonacci.

The Fibonacci Sequence is the series of numbers: 0, 1, 1, 2, 3, 5, 8, 13, 21, 34, ... The next number is found by adding up the previous two consecutive numbers.

## Input #

An integer

## Output #

nth fibonacci term

## Sample Input #

## Sample Output #

8

## Coding Exercise #

Write your code in the code widget below. If you don't get it right, don't fret; the solution is also given.

```
def fibonacci(n):  
    ## write base case  
    ## write recursive case  
    pass
```

Now, let's move on to the detailed solution review of the above problem.
