

# Exercise 1

This first exercise will test your knowledge of aggregate functions.

## WE'LL COVER THE FOLLOWING ^

- Problem statement
- Input
- Challenge

## Problem statement #

Write a SQL query to fetch the count of employees working on project 'P1'.

## Input #

The following tables are available to you as inputs:

**Employee Table**

Emp_Id	Full_Name	Joining_Date
100	John Smith	2019/02/20
101	Anthony Williams	2019/03/01
102	Ethan Carter	2019/01/28

**Salary Table**

Emp_Id	Project	Salary
100	P1	20,000
101	P2	40,000
102	P3	50,000
103	P3	50,000
104	P2	40,000

103	Mathew Mercer	2019/04/ 15
104	Nolan North	2019/05/ 19
105	Ashley Jenkins	2019/09/ 20
106	Amy Madison	2019/07/ 05
107	Emily Simpson	2019/08/ 22
108	Betty White	2019/07/ 09

105	P4	15,000
106	P1	20,000
107	P5	70,000
108	P5	55,000

## Challenge #

Write your query in the widget below. You don't need to worry about creating the tables as they have already been created for you. All you need to do is write the query mentioned in the problem statement.

If you feel stuck or think you have written the right query, the solution is discussed in the next lesson.
