

# Quiz

1

Which of these codes is not the correct way to create a `string_view`?

2

What will be following code output?

```
std::string myStr = "This is a string";  
std::string_view sv = myStr;  
auto sv2 = sv.substr(5, 4);  
std::cout << sv2.data();
```

3

The lifetime of a `string_view` must never exceed the lifetime of the string-owning object.
