

# Quiz

This short quiz will test your understanding of String Conversions!

1

`from_chars` is a set of overloaded functions: for integral types and floating point types

2

What is the purpose of `std::chars_format fmt` in the code below?

```
std::to_chars_result to_chars(char* first, char* last,  
    FLOAT_TYPE value,  
    std::chars_format fmt);
```
