

Where to Go from Here

WE'LL COVER THE FOLLOWING ^

- Courses in data science
- Courses in machine learning
- Feedback

Here are some Educative courses that you might be interested in taking.

Courses in data science

- **[From Python to NumPy](#)**

If you're looking to grow your career in machine learning or data science, in this day and age, adding NumPy to your skillset is an important place to start.

- **[Grokking Data Science](#)**

This course is your comprehensive guide to getting your start as a data scientist.

Courses in machine learning

Educative offers the following machine learning courses:

- **[Machine Learning for Software Engineers](#)**

If you're a software engineer looking to add Machine Learning to your skillset, this is the place to start.

- **[Image Recognition with Machine Learning](#)**

If you want to dive into the technology behind computer vision and self-driving cars, this is where to start.

[Natural Language Processing with Machine Learning](#)

- **Natural Language Processing with Machine Learning**

In this course you'll learn techniques for processing text data, creating word embeddings, and using long short-term memory networks (LSTM) for tasks such as semantic analysis and machine translation.

- **Deep Learning for Industry**

In this course, you'll level up the skills you learned in the Industry Case Study and Machine Learning for Software Engineers.

- **Industry Case Study TensorFlow**

In this course, you'll work on an industry-level machine learning project based on predicting weekly retail sales given different factors.

You can also purchase the complete Machine Learning track [over here](#).

Feedback

Your feedback, comments, concerns, and questions are always welcome! Drop us an email or a comment on the community forum. Looking forward to hearing from you!
