 - Sample Input
 - Sample Output
- Coding Exercise

Problem Statement

Given a function `changeCase(s)`, the task is to convert the strings from upper case to lower case.

Input

A string in upper case

Output

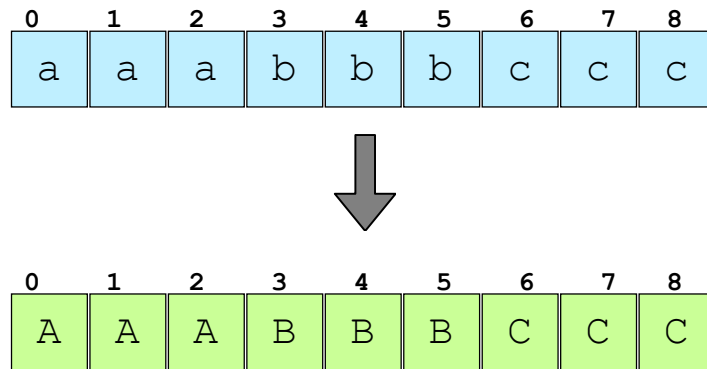

Change case of the string in lower case

Sample Input

“AAA BBB CCC”

Sample Output

“aaa bbb ccc”

Coding Exercise

Use the [Python documentation on strings](#) to solve the following exercise.

Write your code below. It is recommended that you try solving the exercise yourself before viewing the solution.

```
def changeCase(s):  
    # Write your code here  
    a = 0 # convert string to "AAA BBB CCC"  
    b = 0 # convert string to "aaa bbb ccc"  
    return [a, b]
```

Find the solution of the above problem in the next lesson.
