

Challenge 1: Determine Size of a Dictionary

In this challenge, your task is to calculate the size of a dictionary

WE'LL COVER THE FOLLOWING ^

- Problem Statement
 - Input
 - Output
- Coding Exercise

Problem Statement

Given a `lengthDictionary` function that takes `Students` dictionary as a parameter, find how many students are in the dictionary.

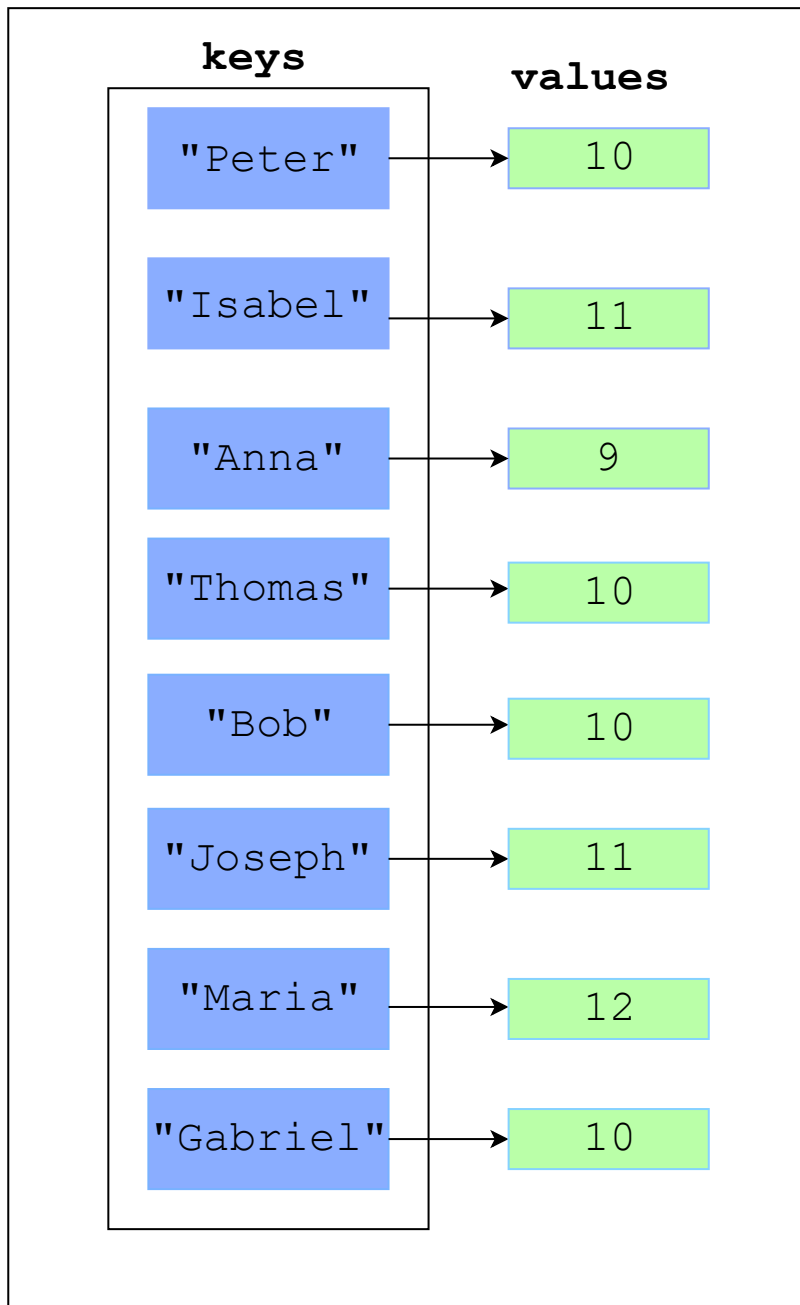

Input

A dictionary

Output

The size of the dictionary

Student dictionary

Size of Dictionary = 8

Coding Exercise

Write your code below. It is recommended that you try solving the exercise yourself before viewing the solution.

Use [Python documentation on dictionary](#) to solve the exercise.

Take the following Python dictionary:

```
def lengthDictionary(Students):  
    return # return length of dictionary
```

return // return length of dictionary

Now, let's move on to the detailed solution review of the above problem in the next lesson.
