

- Exercise

Let's solve an exercise.

WE'LL COVER THE FOLLOWING ^

- Problem statement

Problem statement

Convert floating point numbers to a string.

- The string `{"+0,85 -13,2 1,0 ,45 -13,7 1,03425 10134,25"}` has all numbers in German format.

Replace the German notation in the text by the American, i.e., `+0.85 -13.2`.

```
#include <iostream>

int main() {

    // Write your code here

}
```

The solution will be explained in the next lesson.
