

# Outro

Congratulations, if you've reached this far. You are now ready to go and build beautiful apps using React and Redux.

Congratulations, you've now built your first real-world React application!

We've gone over a lot, starting off with learning the basics of React, integrating a standard JavaScript library with it, fetching and managing data from an API, managing state with Redux and ImmutableJS all the way to testing our entire app!

This is everything you need to know to get started building your own app with React. Go out there and create amazing things!
