

Quiz

Let's test your understanding of inheritance with the help of this short quiz.

1

Which one of the following is the generic syntax to derive a class from another class?

2

A derived class can use all the fields and methods of the superclass directly which are:

3

```
class A {  
  
    int i;  
    public A(int i)  
    {  
        this.i=i;  
    }  
  
}  
class B : A{  
  
    int j;  
    public B(int j)  
    {  
        this.j=j;  
    }  
  
}
```

The above code won't compile because:

4

The `base` keyword can be used to call any of the non-private ____.

5

Calls to constructors using `this()` or `base()` can be written:
