

Challenge 1: Sum Elements of a List

In this challenge, you are required to compute the sum of elements in an array.

WE'LL COVER THE FOLLOWING ^

- Problem Statement
 - Input
 - Output
 - Sample Input
 - Sample Output
- Coding Exercise

Problem Statement

Create a `sumList` function that receives a `list` as a parameter and returns the sum of all the elements in the list.

Input

A list

Output

Sum of elements in the list

Sample Input

[1, 2, 3, 4, 5]

Sample Output

15

Coding Exercise

Write your code below. It is recommended that you try solving the exercise yourself before viewing the solution.

For this section, you may want to consult the [Python documentation on Loops](#).

```
def sumList(l):  
    pass
```

Now, let's move on to the detailed solution review of the above problem.
