

Challenge 2: Calculate Sine, Cosine, and Tangent of User Input

In this challenge, you are required to calculate the sine, cosine, and tangent of variable x .

WE'LL COVER THE FOLLOWING ^

- Problem Statement
 - Input
 - Output
 - Sample Input
 - Sample Output
- Coding Exercise

Problem Statement

Use the `calculateSinCosTan()` function; it takes a number x as a parameter and shows the result of the sine, cosine, and tangent of the number.

Input

A number

Output

Calculate the sine, cosine, and tangent of that number

Sample Input

0

Sample Output

[0, 1, 0]

Coding Exercise

Coding Exercise #7

Write your code below. It is recommended that you try solving the exercise yourself before viewing the solution.

Suggestion: Check the [Python library reference](#) for more details!

```
import math
def calculateSinCosTan(x):
    #write your function here
    sine = 0#calculate sine
    cos = 0#calculate cosine
    tan = 0#calculate tangent
    return [sine, cos, tan]
```

Now, let's move on to the detailed solution review of the above problem.
