

# Challenge 3: Return Key With Maximum Value

Let's learn to find a key with the maximum value.

## WE'LL COVER THE FOLLOWING ^

- Problem Statement
  - Input
  - Output
- Coding Exercise

## Problem Statement #

Implement an `oldestStudent` function that receives the `ages` dictionary as a parameter, and returns the name of the oldest student.

## Input #

A dictionary

## Output #

The key associated with highest age, i.e., the name of the oldest student

Use [Python documentation on dictionary](#) to solve the exercise.

Take the following Python dictionary:

## Student dictionary

**Key with maximum value  
=> Maria**

## Coding Exercise #

Write your code below. It is recommended that you try solving the exercise yourself before viewing the solution.

Use [Python documentation on dictionary](#) to solve the exercise.

Take the following Python dictionary:

```
def oldestStudent(ages):  
    #write code here  
    pass
```

Now, let's move on to the detailed solution review of the above problem.
