

# Coding Challenge #3: From Celsius to Fahrenheit degrees

This short coding exercise is about writing a program that takes inputs from users in Celsius unit and returns it in Fahrenheit degree.

## WE'LL COVER THE FOLLOWING ^

- Problem Statement
- Input
- Expected Output
- Coding Exercise

## Problem Statement #

Write a program that asks for a temperature in Celsius degrees, then displays it in Fahrenheit degrees.

The conversion between scales is given by the formula:  $[^{\circ}\text{F}] = ([^{\circ}\text{C}] \times 9/5) + 32$ .

## Input #

Prompt user to enter temperature in Celsius, let's say user entered 40.

```
Enter Temp in Celsius : 40
```

## Expected Output #

Calculate temperature in Fahrenheit and display the result:

```
Temp in Fahrenheit: 104
```
