## - Exercise

Let's solve an exercise.

we'll cover the following ^
• Problem statement

## Problem statement #

Convert floating point numbers to a string.

• The string {"+0,85 -13,2 1,0 ,45 -13,7 1,03425 10134,25"} has all numbers in German format.

Replace the German notation in the text by the American, i.e., +0.85 -13.2.

The solution will be explained in the next lesson.
