Quiz

Let's test your understanding of inheritance with the help of this short quiz.

Which one of the following is the generic syntax to derive a class from another class?

A derived class can use all the fields and methods of the superclass directly which are:

3

```
class A {
    int i;
    public A(int i)
    {
        this.i=i;
    }
}
class B : A{
    int j;
    public B(int j)
    {
        this.j=j;
    }
}
```

The above code won't compile because:

_	
5	Calls to constructors using <a)"="" href="this(">this(") or <a)"="" href="base(">base(") can be written:
