Quiz

In this lesson, we will solve a quiz related to the concepts covered in the previous lesson.

we'll cover the following ^
• Quiz
• Coding Challenge

Quiz

Coding Challenge

Given the following code, create a new array starting from the following string where each letter of the string becomes an item in the array.

```
function testResult(){
   const apple = "Apple";

   // edit the following line
   const myArr = []
   return myArr;
}
// expected output = ["A", "p", "p", "l", "e"]
