Problem Statement

Write a findGCD function that takes in two numbers as input a and b and finds the greatest common divisor of the two.

Input

Two numbers

Output #

GCD of numbers

Sample Input #

a = 8, b = 12

Sample Output #

4

Coding Exercise

Suggestion: Check the Python library reference for more details!

You have been provided with some starter code that allows you to write your code within a function.

Now, let's move on to the detailed solution review of the above problem.
