Quiz

It's quiz time! Answer the following questions to test your knowledge and understanding.

1 AWS Lambda usually works by sending all requests from a single user to the same machine so that web servers can keep session state in memory.

2 Which endpoint is automatically activated by AWS when you create an S3 bucket?

3 Fill in the blank:

_____ is an optional property for `DeploymentResource` that defines the access control for uploaded files.

4 Fill in the blank:

_____ is a managed hierarchical database intended for direct use by client devices, and it can automatically synchronise states across multiple clients, resolve conflicts, and even handle offline usage scenarios.

5 Select all the uses of CloudFront:
