# Quiz

In the following quiz, you will be tested on concepts you learned in this chapter.

1 Which of the following is not a goal of the Ops team in DevOps?

2 How do Docker containers help solve dependency conflicts between applications?

3

How do Docker containers allow scaling up when a single server isn't enough to run an application?

Check Answers

This wraps up our discussion on the advantages of Docker containers. In the next chapter, we will set up Docker on our local machines.
