Coding Challenge #1: Language List

In this coding challenge, you will cover a small exercise related to querying a web server. See if you can solve it on your own!

Problem Statement

The objective of this exercise is to display the languages of the previous file languages.txt on a web page. You have to write JavaScript code that fetches the file from the web server and fills the HTML list.

Link to file:

https://raw.githubusercontent.com/bpesquet/thejsway/master/resources/languages.txt

Here's a starter HTML and JavaScript code:

Output
JavaScript
HTML

A few programming languages

The final output should look like this:

A few programming languages

- C++
- Java
- C#
- PHP
