Challenge: Print the Number of the Month from a Given Date

This coding challenge is based on the concept of formatted input.

Problem statement

Write a program that reads a date in the format "year.month.day" as input and displays the "month" from that date.

Input

Date in the format year.month.day
Output

Number of the month

Sample input

```
2009.09.30
```

Sample output

```
9
```

Challenge

This problem is designed for you to practice, so try to solve it on your own first. If you get stuck, you can always refer to the explanation and solution provided in the next lesson. Good luck!

Show Hint

```d
import std.stdio;

void main() {

}
```

Code to print the number of month from a date

In the next lesson, we will look at a solution to this challenge.
