Quick Quiz on Classes

1 In Python `__init__` is

2 With the following code, which of the options is true?

```python
class Person:
  def __init__(self, fname, lname):
    self.firstname = fname
    self.lastname = lname

  def printname(self):
    print(self.firstname, self.lastname)

class Student(Person):
  def __init__(self, fname, lname, year):
    super().__init__(fname, lname)
    self.batch= year

x = Student("Alex", "Vice", 2019)
x = Student("Anna", "Bate", 2018)
print(x.batch)
```
