Initial Styling

Here's the current state of the project:

```html
html
<html>
 <head>
   <title>Signup Form for Startup X</t
 </head>
 <body>
   <main>
      <section class="testimonial">
         <img src="http://i.imgur.
         <h3> Ohans Emmanuel </h3>

         </div>
         <button type="submit"> SIGNUP </button>
      </form>
   </main>
 </body>
</html>
```

Ohans Emmanuel

I have worked with Startup X' product, and I think it is fabulous. I highly recommend the use of this product. It is simply a life saver.

Signup Form

Email Address

Password

☐ I Agree with the terms of service

There's nothing to be excited about - at this point.

Below is the initial set of styles we need to get started:

Ohans Emmanuel

I have worked with Startup X' product, and I think it is fabulous. I highly recommend the use of this product. It is simply a life saver.

Signup Form

Email Address   Password
☐ I Agree with the terms of service
SIGNUP

By the way, that's an old picture. I look a lot older now :)

Please take a look at the CSS tab above.

Vertical Alignment

We have successfully positioned the `main` content area along the **horizontal** with `margin: 0 auto`

What about the vertical? i.e the direction from top to bottom?

We haven't had any luck with this.

The naive way to force the the `main` content area down would be by adding a `margin-top` .

However, this does not give a correct vertical alignment still. It is speculative, as you do not know what total height the user's device possesses.

Let's see a better way to handle this with Flexbox.
