Learning Outcomes

This lesson explains the learning outcomes of this course.

In this course you will learn:

- **How to create routes (or views) with** `Flask`.

- **How to serve static content and files using** `Flask`.

- **How to serve dynamic content using the** `Jinja` **Templating Engine.**

- **How to handle forms using the** `flask-wtf` **module.**

- **How to work with a database using the** `flask-SQLAlchemy` **module.**

- **How to create** `Models` **and manipulate data using them.**

And the most rewarding outcome of this course is that you will learn:

- **How to build a** `Flask` **application, hands-on.**

Now, without further ado, let's get started!
