Conventions

Here, I'm just listing down a few points about how the course content is structured.

WE'LL COVER THE FOLLOWING ∧

- Special Fonts
  - Italic:
  - Ticks:
  - Special Boxes:

I promise only a few conventions.

Special Fonts

Italic:

I use Italic if something is essential.

Ticks:

I use double ticks `` for code, instructions, keywords, and names of types, variables, functions and classes. For example, `void myFunction()`.

Special Boxes:

I use boxes for unique information, tips, and warning.

> **i Information headline**
> Information text

> 🔑 **Tip headline**
> Tip description

⚠️ **Warning headline**

Warning description

Now let's move on to some code conventions that you should remember while taking this course.
