# I Never Get Satisfied. Do You?

After spending so much time explaining and loving the phone we built, I woke up later and didn't love the overall design.

So, I spent a few hours messing around until I got this:

Output
HTML
CSS (SCSS)

Is it perfect? heck no!

It's alright if you don't like the new design.

I just wanted to make the point that you can tweak your design as much as you want - to your heart's content.

Yeah, I like the new design!

Be sure to click the CSS pane to see what's changed.

You'll be surprised how little changes make big impact :)

Do It Yourself

I have set up a playground below. The playground has the initial markup for the iPhone but without the CSS style.

Now, let's see what you've got!

Can you rebuild the iPhone from scratch?

Get creative, do your own thing

HTML   CSS   JavaScript   Output

```html
1  <html>
2   <head>
3    <title> Teach me positioning </title>
4   </head>
5   <body>
6    <section class="phone-body">
7     <div class="phone-inner">
8      <article>
9       C S S 😎 R O C K S
10     </article>
11    </div>
12   </section>
13  </body>
14 </html>

C S S 😎 R O C K S

Hello, Hello

Hey, don't cheat!

Be sure to show off your final design on Slack too. I'll love to see what you come up with.
