# Quiz

In this lesson, we will solve a quiz to test the concepts that we have covered.

**1**    Which of the following will produce a centered heading "Hello World"?

**2**    To be rendered, an `HTML` template file should be placed in which subdirectory of the web application?

**3**

The `HTML` templates are rendered using which of the following function call?

Check Answers

---

Good job solving this quiz! Now, we are done with this chapter.

In the next chapter, we will learn how to host *static files* in our Flask application.
