Test your skills

Feel free to read the man pages (`awk` , `cut` and `sort`) before attempting the quizzes below:

Quizzes

1 AWK is a programming language designed for text processing and typically used as a data extraction and reporting tool. What statement will print all but the very first column:

2 Which command extracts 8 characters from the beginning of each line from test.txt file?

3

Which of command extracts from 3rd character to end of each line from test.txt file?

4

Which of the following commands displays username (col 1) and home directory (col 6) of users who has the login shell as "/bin/bash"? (extract data from /etc/password and choose two answers)

5 Sort and removes the duplicates (choose all that are correct!)
