Quiz

A short quiz to test your understanding of classes in C#.

1 In general, the primary constituents of a class can be divided into the following two parts:

2 What is the output of the code below?

```
class Score {
    private int _num;
    public Score() {
        this._num = num;
    }

    public int GetNum(){
        return this._num;
    }
}
```

```
class Demo {
  public static void Main(string[] args) {

    var sc = new Score(5);
    System.out.println(sc.getNum());
  }
}
```

3

If you don't define any constructor, the C# compiler will insert a default constructor for you.
